

Responsible Sourcing Policy

GoCo Group understands the importance of responsible sourcing, and where possible, will support local, fair trade and environmentally sustainable options as priority.

GoCo Group uses local and regional companies to provide its office furniture, to ensure minimal mileage impact and to support local business where possible. We have selected an on-site caterer that sources only local fresh produce, which is responsibly sourced and traceable. We ensure any meat and fish product that is used on site is traceable, sustainable and responsibly sourced, further detail on this can be produced on request.

We are advocates of supporting local businesses and local trades persons. All maintenance contractors are locally based to the GoCo site they are working on, also ensuring supplies and materials are sourced locally, with minimal mileage to reduce our environmental impact.

General office supplies such as stationery are sourced locally, supporting local businesses, thus reducing the impact of delivery emissions.

Group wide we endeavour to source responsibly and are identifying ways to improve our sourcing policies where this is currently not local; we operate internal annual reviews of procurement processes and are working to educate teams so they are more mindful of the whereabouts of their sourcing, valuing locality over cost savings.
